MEASURING

DM S50L Sonic Measure

Sonic Measure with Laser Targeting

DM S50L measures interior room dimensions up to 50 feet (15 m) and includes Zircon's exclusive laser targeting to ensure accuracy. Measure for carpet, paint, and more, now quicker and easier than ever before.

Point the laser to the far wall, click the READ button, and the distance appears on the easy-to-read LCD screen in feet and inches or metric units.

DM S50L automatically measures length and calculates area, volume, and double segments.

Easy-to-follow, on-screen graphics prompt users through functions for length, area, and volume measurements.

Laser targeting pattern shows the area of the cone-shaped sonic beam for more accurate measurement positioning.

- Fast, automatic measurements
- Laser targeting for increased accuracy
- Error indication instead of false readings when target is not capable of giving an accurate measurement
- Stores numbers of measurements taken to calculate square footage and volume
- Conserves battery power, automatic shutoff after 30 seconds
- Switch from feet/inches to metric units with the push of a button

SPECIFICATIONS

| | |
|------------------------------|---|
| Dimensions | 4.75 in. H x 3.58 in. W x 1.62 in. D (121 mm x 91 mm x 41 mm) |
| Weight | 4.7 oz. (133 g) without battery |
| Battery Type | 9-V alkaline (not included) |
| Position Accuracy | 99.5% ± 1 digit |
| Range | Typical: 50 feet (15 m) Actual: will vary depending on environmental conditions Minimum: 2 feet (.608 m), measures from back of unit |
| Operating Temperature | 20°F to 120° (-7°C to 49°C) |
| Storage Temperature | -20°F to 150° (-29°C to 66°C) |
| Humidity | 80% (non-condensing) |
| Water Resistance | Splash and water resistant, not waterproof |
